Information and processes of renovating or creating your ideal bathroom

SEQBUILDERS

About

SEQ Builders are very experienced in building a new bathroom/en-suite from the ground up or simply renovating an existing.

From the initial quote, where we have a tradesman take the time to go through design, layout and style options, through to the final fit off, where we present a high quality well-functioning room, the team at SEQ Builders will be with you every step of the way.

The Process

Once a design and start date are locked in, you will need to select your 'PC' items (prime cost); don't worry we give you a list of what is required. You can source these items yourself or ask us to source all or specific things. Likely items to be chosen for a bathroom include:

- Tiles – walls, floor & splash back
- Paint – ceiling, walls, doors & trims
- Electrical – lights, switches & power points
- Plumbing – shower head, bathtub, toilet & vanity
- Carpentry – mirror, door locks & accessories
- Extras – underfloor heating & skylights

"Recently used Lenny and James to do a renovation at a Carindale rental property. New kitchen plus toilet/bathroom. Very professional and job was done within 2 weeks. Very happy to recommend to anyone."

Once building works have commenced we will require your PC item selections and dates we need them on site. We will keep you informed of progress and get your feedback where required. Feel free to liaise with our tradesmen for finer details.

We organize all trades, carpenters, water proofers, plumbers, tilers, electricians and we make sure they are coordinated so your progress is efficient as possible. We are also happy to work with tradesmen you may know. Most importantly we aim for a stress free high quality product with excellent customer service.
